

## How to add photos, comments and submit work

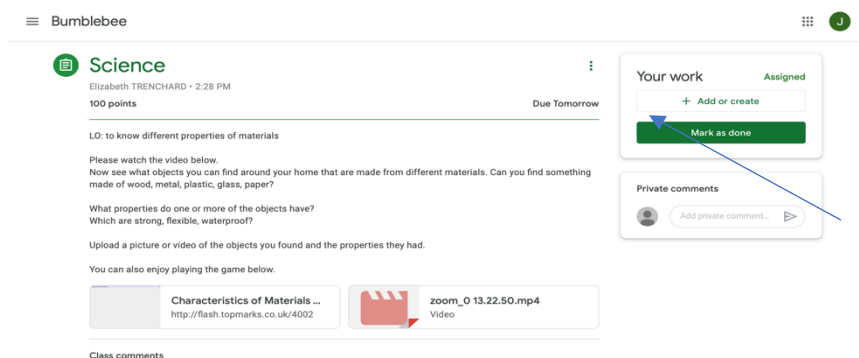

This is your home page.

Select the assignment you want to work on.

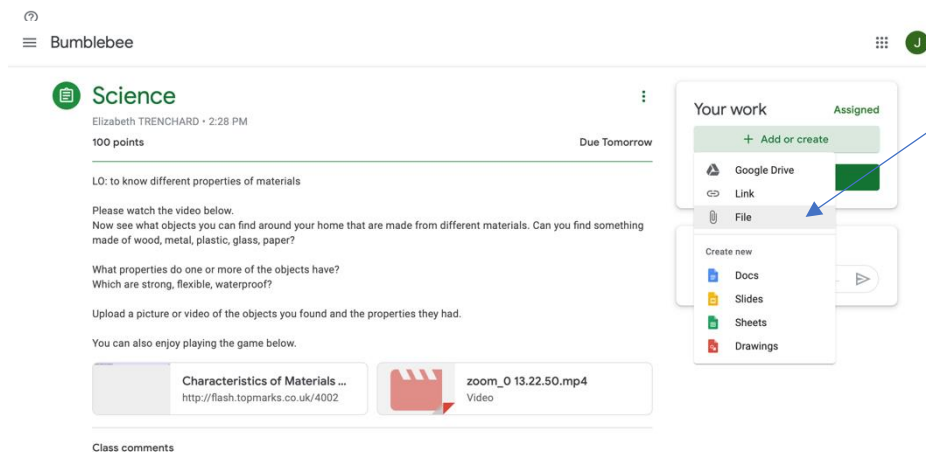

For this tutorial it's the science assignment.

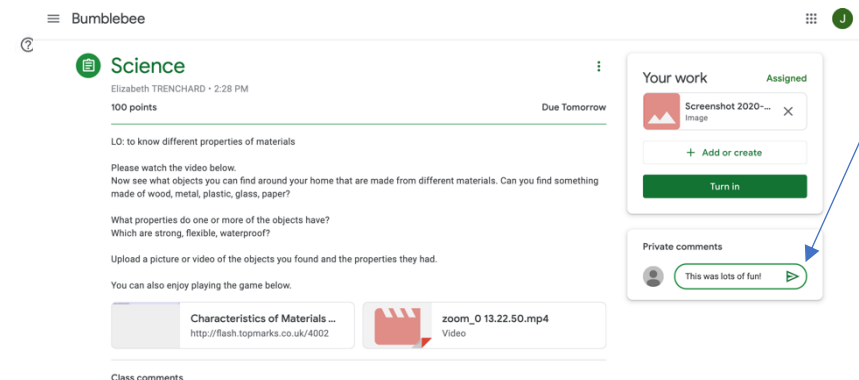

Once you have read the assignment and completed it you can go to the add or create button.

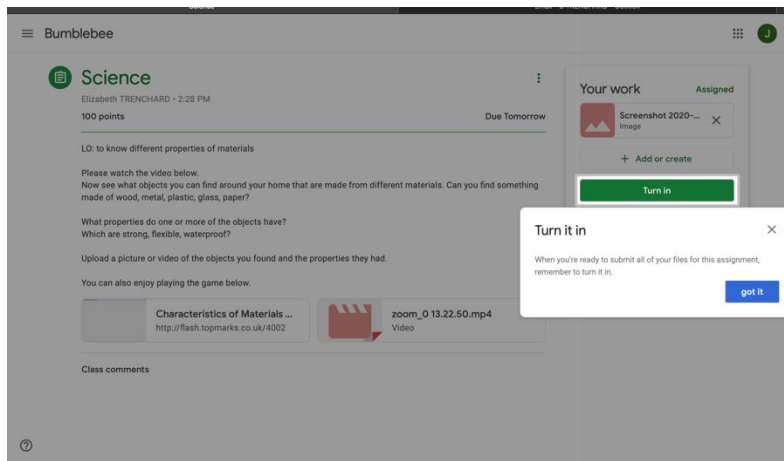

If you go to the file button you can choose to upload a video or photo from where it is saved on your computer, phone or tablet.

You can also type a message to the teacher. Let us know if it was easy/hard, you enjoyed it or did something differently. We can message you back too!

Then hit the button to turn it in. We then know the work is completed.
